

DEPARTMENT OF THE INTERIOR
UNITED STATES GEOLOGICAL SURVEY

**DISTRIBUTION AND ABUNDANCE OF TIN IN THE MINUS-80-MESH FRACTION OF STREAM-SEDIMENT SAMPLES,
SURVEY PASS 1°X3° QUADRANGLE, ALASKA**

By
J.B. Cathrall, T.M. Billings, and E.F. Cooley
1979

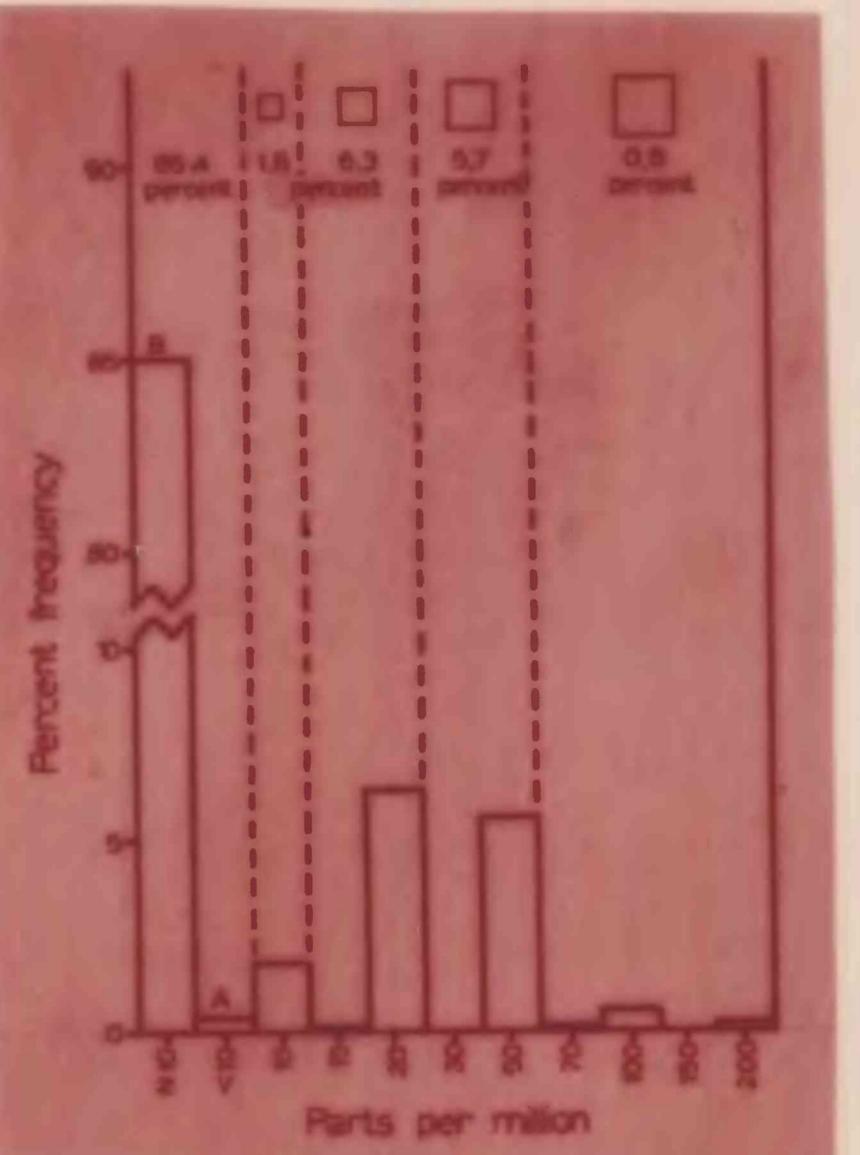

Figure 1.—Histogram for tin in 1493 minus-80-mesh stream-sediment samples, Survey Pass 1° x 3° quadrangle, Alaska, showing map symbols corresponding to anomalous concentrations in parts per million, percentage of total samples, and letters corresponding to non-anomalous concentrations in parts per million. N, not detected at values shown; <, detected, but less than value shown. Arithmetic mean, 34; standard deviation, 23; geometric mean, 28; and geometric deviation, 1.9, based on unqualified values within the sample population.

EXPLANATION

TIN SAMPLE SITES—Letters and size of symbols are explained on histogram (fig. 1)

<input type="checkbox"/>	Anomalous
<input checked="" type="checkbox"/>	Not anomalous

NOTE

This map is one in a series of geochemical maps concerning the Survey Pass 1° x 3° quadrangle, Alaska. For discussion of analyses and sampling see Cathrall and others, 1979.

Cathrall, J. B., Cooley, E. F., O'Leary, P. M., Billings, T. M. and McDanal, S. K., 1979, A listing and statistical summary of spectrographic and chemical analyses of stream-sediment samples from the Survey Pass quadrangle, Alaska: U.S. Geological Survey Open-File Report 79-837-A.
